

(a) 79 monthly matrices, 2020-01 to 2026-07: 17 clear the floor, all of them term months

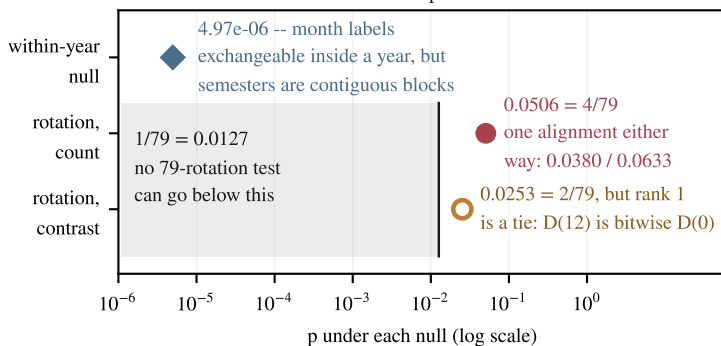

(b) the same 17 months under every rotation of the school calendar: 3 of 78 alternatives match

(c) the rotations are distinct but not independent: agreement with the true labelling

(d) neither null dominates, and the rotation has little resolution to spend

(e) the rotation moves the per-year margins
